

PRESS RELEASE

SEISMIC INTERPRETATION AVAILABILITY

Agência Nacional do Petróleo de SãoTomé e Príncipe (ANP-STP) a.k.a. National Petroleum Agency is pleased to release today further details concerning the availability of additional information in the STP EEZ Licensing Round that closes on September 15th 2010.

Following requests from Companies, ANP-STP has agreed to make available its regional interpretation of key horizons within the EEZ to Companies who have first license the seismic data. This will assist Companies in their regional understanding and allow them to focus their efforts on determining the prospectivity of the EEZ.

Available Seismic Horizons

1. Sea Bed
2. Neogene
3. Horizon 3 (not identified)
4. Palaeogene
5. Horizon 5 (not identified)
6. Base Santonian
7. Cretaceous
8. Top Basement

The seismic interpretation is in addition to the other data and report on offer which are detailed on www.stp-eez.com and available for review in the data rooms.

Companies are advised the data rooms remain open in London and Sao Tome.

1st July 2010
